

The W-2 Caseload Report is now available. This report replaces the previous WebI Caseload Report #26.

The new report is located in WebI: Wisdom\Employment Programs\Wisconsin Works\Caseload Reports\CL Report 01:W2 Caseload Report.

The new report is organized by the new 2013 contracted agencies and information not previously included on the Caseload Report #26.

The information displayed on each tab is described below.

Tab 1: Statewide W-2 placements by Month. The previous report listed only paid caseload placements. The new report lists paid, unpaid, and a new category entitled “subsidized” placement type. Trial Jobs are now listed under the subsidized placement type.

Tab 2: Statewide Total W-2 Caseload by Contract Agency. The total caseload for each contract agency is displayed on this tab. Whenever data from 2012 is chosen as part of the display, a row entitled “Pre-2013 Contract Milwaukee County” will appear. This row displays the total caseload for all of Milwaukee County prior to the 2013 contract. Beginning with January 2013 data, the Milwaukee caseload is distributed among the four contract agencies serving Milwaukee County.

Tab 3: Total W-2 Caseload by County. This displays the total caseload for each county organized by contract agencies.

Tab 4: W-2 Placements by Agency. This table displays all paid, unpaid, and subsidized placements by each contract agency. It also includes a column titled “Unduplicated Total.” For each contract agency, the unduplicated total is the number of unduplicated cases served for the displayed months.

Tab 5: W-2 Placements by County. This displays all paid, unpaid, and subsidized placements for each county organized under the new 2013 contract agencies. This table also displays an unduplicated count.
